SUMMARY

Junior iOS Developer and Computer Science graduate with hands-on experience building iOS applications using Swift, UIKit, and SwiftUI. Experienced in RESTful APIs, Firebase, Core ML, CoreLocation, Auto Layout, and Git. Built and contributed to multiple iOS projects including a smart healthcare platform, real-time chat application, image classification app, and weather application.

EDUCATION

Bachelor of Computer Science

Graduated 06/2026

Shorouk Academy — El Shorouk, Egypt

SKILLS

iOS Development

Swift · SwiftUI · UIKit · MapKit · CoreLocation · Local Authentication · Combine · Core ML · Notifications

Networking

REST APIs · API Integration · Firebase · async/await

Tools & Dependency Management

Git & Source Control · Swift Package Manager · CocoaPods

Software Engineering

Data Structures · Object-Oriented Programming · Protocol-Oriented Programming · Design Patterns · Clean Architecture · MVC · MVVM

CERTIFICATES

- Deep Dive iOS 26 & SwiftUI 6: 90-Hour Project-Based Course (*In Progress*)
- Swift, UIKit & SwiftUI Development — Angela Yu, Udemy (2023)
- iOS App Development Using Swift — Maharatech
- C++ Programming Language, OOP, Data Structure & Algorithm — IT Sharks
- Learn C++ Programming — Barmej

TRAINING

- ITI Native iOS 26 Summer Training
- C++ Programmer — IT Sharks

PROJECTS

Wiqaya – Smart Healthcare Platform

Graduation Project | iOS

Swift UIKit REST APIs MVC MapKit CoreLocation

github.com/ahmad-alshafei/Wiqaya-iOS

- Developed the iOS application using Swift and UIKit following MVC architecture.
- Integrated RESTful APIs for doctor booking, patient data, appointments, and healthcare services.
- Implemented doctor appointment booking flows and availability handling with dynamic UI updates.
- Integrated MapKit/CoreLocation for location-based healthcare features.

CoreLens – Image Classification App

Swift UIKit Core ML

github.com/ahmad-alshafei/Core-Lens

- Integrated Apple Core ML to perform on-device image classification.
- Implemented image preprocessing and prediction workflows to classify objects from camera/gallery input.
- Displayed prediction results ranked by confidence score.

FlashChat – Real-Time Chat App

Swift UIKit Firebase CocoaPods SPM

github.com/ahmad-alshafei/FlashChatApp

- Implemented user authentication using Firebase Authentication.
- Integrated Firebase Cloud Firestore for real-time message storage and synchronization.
- Built real-time chat functionality using Swift and UIKit.
- Managed third-party dependencies using CocoaPods and Swift Package Manager.

Clima – iOS Weather App

Swift UIKit CoreLocation OpenWeather API

github.com/ahmad-alshafei/Clima

- Fetches real-time weather data from the OpenWeather API.
- Uses CoreLocation for automatic location detection and supports manual city search.
